London. — Sir Dennistoun Burney, head of the Airship Guarantee Company which built the R-100, sister ship of the giant yessel that crashed yesterday, scouts any motion that smoking aboard the R-101 had any part in the disaster. "It would be grossly unfair to select any one theory at present, though many of course suggest themselves instantly". suggest themselves instantly", said Sir Dennistoun, who is now one of the few airship experts left to Britain. "It was possibly some-thing hitherto unknown in air-ship experience, he added."

# Barn Is Prev To Flames At

Property of Mr. John Burnet Destroyed by Blaze-Two Cars, Chickens and Animals Saved From the in-Council.

Cowansville.—A severe fire comoletely destroyed the barn of Mr. John Burnet, of this locality. yeserday morning. The flames started n the barn and threatened t spread to the house nearby.

The fire was first noticed at six 'clock when Mr. Burnet was awakened by the barking of his dog. As sistance was immediately obtained and a bucket brigade was formed to combat the flames. This bucket brigade proved the means of savng the house, the untiring and courageous efforts of the men, who numbered over thirty arresting the conflagration before it had spread to the nearby residence.

Two cars were saved from the barn, together with sixty chickens and other animals. A heavy loss of hay was sustained, however, to-1930 low price on the Standard gether with Mr. Buinet's winter supply of potatoes.

> The origin of the fire is un-konwn. The loss was partly covered by insurance.

Forty-Seven Were Either Killed or Burned to Death in Initial Terrific Impact—Seven Survivors All Injured, Some Seriously — Among Dead Are Lord Thompson, British Air Minister, and Sir Sefton Brancker, Director of Civil Aviation — Joint British-French Investigation Started Today — Radical Step Forward in Construction of R-101 Was Introduction of Crude Oil-Burning Engines in Place of Gasoline Engines Heretofore in General Use.

# **Nullifies The** Work of Years

Aside from Tremendous Loss in Air Leadership, Two Year's Contsruction on R-101 and Five Million Dollars Expenses Have Been Nullified.

London. - In one flash Great catastrophe. Britain has lost through the disaster to the R-101 much of the accumulated experience of aviation construction and operation gained during post war years.

Many of the little group of experts, most of whom are now dead, light be described figuratively as British aviation's general staff."

For years they have been laborng to overcome Germany's superiority in the construction of dirigibles. Aside from the tremendous loss in air leadership, two years' construction of the R-101 and five million dollars' expense have been nullified. It is a big setback in Britain's efforts to put over a great airship construction program me in which millions of pounds have been spent annually by some the Empire.

Prominent among the group of experts lost in the wreck of the was Lieutenant-Colonel V.C. Richmond, its designer. He was to Great Britain what Count Zeppelin was to Germany.

### STATED THREE OF BODIES HAVE BEEN IDENTIFIED

Paris. — An Havas News Agency despatch from Beauvais today said that three of the bodies of the R.-101 disaster had been identified, but that the authorities declined to make any an-nouncement until relatives were notified.

# **Session Will**

Unemployment Relief Plans to Be Main Feature at Fourth Session of Seventeenth Legislature of Province of Quebec, Which is to Open on December 2.

Quebec. - The fourth session of the seventeenth Legislature of the seventeenth Legislature of the Procember 2nd, a month earlier than er, used the single eye glass. usual, in order to deal with economic contingencies.

It is probable that the Legislature will get right down to business from the beginning, and will consider special measures needed to allow public works to be executed with the aid of Federal grants. The Government itself will have to pass legislation which will permit some portion of the Federal grants to be used for public works now Guilty of High Treason being planned, in addition to giving certain municipalities the right to borrow when such powers have been executed or do not exist.

Bridges are to be built wherever possible on the main highway, and the contruction of these alone will use up a great share of the appropriations which will be provided.

All vacancies will have been filied in the Legislative. Ranges. One daughter and three and spoke of the importance of this sons survive.

Beauvais, France. — A joint British-French investigation was begun yesterday into the destruction of the British Dirigible R-101, largest airship in the world, which Sunday morning crashed into a wooded hillside near here and burned.

Forty-seven persons lost their lives as a result of the disaster. Forty-six were either burned to death or killed in the initial terrific impact, and one died in hospital. Of the fiftyfour aboard the ship there were seven survivors. All were injured, some seriously. Among the dead were Lord Thomson, British Air Minister, and Sir Sefton Brancker, director of civil aviation.

Astounded and grief stricken at the disaster which in a moment robbed it of the title of mistress of the air and several prominent officials, the British Government dispatched Sir John Salmond, air marshall and chief-of-staff, to initiate an enquiry and determine the circumstances and cause of the

French proffers of co-operation were accepted. Sir John flew back to London, leaving Major A. V. Holt in charge, with the expectation that he would be named president of the investigating board, meeting today. He himself would say nothing of the disaster other than that there was every reason to suppose the explosion which destroyed the ship was caused and occurred after the forced landing of the ship. The dirigible, which took off from Cardington, took fire

as it struck the ground, and the victims were both burned and horribly mutilated beyond hope of positive identification. The cause of the catastrophe, one of the most harrowing in the history of man's conquest of the air, was generally ascribed to violent storms which broke over northwest France during the early hours of Sunday and relentlessly forced the dirigible to the ground. The squalls and torrential rains, it is believed, pounded the dirigible so hard the pilots lost all control and the airship plunged downward, burying her nose with the fearful impact into the tree-dotted slope. The word 'generally" is employed purposely because some witnesses to the tragedy declare the airship had bad motor trouble some ten minutes or so before the crash. These witnesses exof the greatest aviation brains in pressed the opinion the dirigible seemed out of control.

### WORLD'S LARGEST DIRIGIBLE

The great Dirigible R-101, which sailed proudly away from Cardington on Saturday evening on an experimental flight to India, only to meet disaster a few hours later, embodied the most advanced ideas bearing on British airship

She was the largest dirigible in the world, with a bulk of 5,000,000 cubic feet and a length of 775 feet. A radical step forward in her construction was the introduction of crude oil burning engines in place of gasoline engines heretofore in general use. This reform greatly reduced the fire risk. On gasoline driven airships smoking is not permissible because of the danger of fire causing an explosion, but there was no order against smoking on the R-101.

The motors on the R-101 were five in number as compared with six on the R-100. She had five engine compartments, each containing one motor. Four of the units were in pairs located some distance behind the passenger accommodation, while the fifth hung from the centreline near the rear end of the ship, so situated that it would give a good flow of

The engines were of the Beardmore type, with a continuous rating of 885 h.p. and a maximum rating of 650 h.p. each. They had eight cylinders, each arranged upright and Start Early in line, the bore being 8 1-2 inches and the stroke twelve inches. The fuel oil, it was found, would not give off any inflammable vapor at all unless it became heated to the tem-

perature of boiling water.

As originally designed the R-101 was 732 feet long, with an estimated lift of 150 tons. An extra bag was later inserted to take care of the extra lift required for the heavier oil engines decided upon. This brought her length to 775 feet. Her main girders were of stainless steel with daralumin webb or cross tubes and steel wire bracings.

Sir John ordered that every effort be made to identify forty-six of the bodies, all charred beyond recognition, some of them only bones with scraps of tendon attached. So intense was the heat that developed as the ship burned that rings, in some cases, were melted about the fingers of the victims. A monocle found with one body may fix identity of that one, vince of Quebec will open on De- since only two aboard, Lord Thomson and Sir Sefton Branck-

# Sherbrooke **Mourns Death** of Father Cain

morrow Morning.

Sherbrooke. - A pall of sorrow was cast over ecclesiastical circles of Sherbrooke and the East- A. C. Crepeau ern Townships when the news of the death of Rev. Father Stewart Cain was heard. The late Father Cain passed away at the St. Vincent de Paul Hospital about five o'clock Saturday afternoon from had been stricken with an attack of typhoid fever. Several days at the local institution with the best medical care were unable to save the life of the beloved priest, who hal been superior of St. Charles Seminary for a little over a year.

Father Cain, whose death is universally mourned, was born in spent in the Sulpician College, in Montreal, Father Cain spent twenty years in the local seminary. On June 29th, 1919, he was ordained priest at the St. Michael Cathedral, and later become professor of Eng-In June, 1928, he was named vicehas not been officially announced, and in the following year has not been officially announced, and in the following year although it is almost certain that he will fill the vacancy.

An excellent paper was read by he will fill the vacancy.

Mrs. H. Warnes, on "Emergencies of the will fill the vacancy."

Yesterday afternoon at two eral members of the Harmony Province. band, under the direction of Prosilently wended its way through in Quebec. King street and along Convent street, where crowds of people bared their heads. In the assemblage Imperial Airways which followed the remains were noted Mr. Armand Crepeau, M.L. A., for Sherbrooke, the members of the Seminary personnel, mem-bers of the City Council and many prominent citizens. The Cathedral bells tolled solemnly as the cortege came into view on Convent street, and when the Seminary was reached the College boys formed a guard of honor on both sides of the walk as the body was brought into the college parlors. Here, it remains in mise at such an early age removes a well known figure in local educa-tional circles.
