You know that a manufacturer includes in the selling price of his product a percentage for press advertising—a percentage ranging from 3 to 5 per cent-sometimes, even more-when consumer-resistance is great or when the gross profit margin is very large. So, when a manufacturer spends \$50,000 a year on press advertising, it can be assumed that the total annual sales of his product amount to from  $\pm 1.000.000$  to  $\pm 1.500.000$ .

Now, if you are stocking a nationallyadvertised product - advertised in bigcity dailies and in nationally-circulated magazines, you have a right to see this product also being locally advertised-in this newspaper. Your total annual sales of the maker's product, joined to those of its other local distributors (if there are others), entitle you to demand that the product be locally advertised in this newspaper.

If the maker or his representative done for the product in big-city dailies done for the product in big-city adilies and in national magazines, tell him that upwards of 90 per cent. of the families in your sales territory do not subscribe to a big-city daily or to a national magazine; and that, therefore, he is putting on your shoulders the burden of creating and maintaining sales.

in response to the Government's request that early settlement be made. It is no wonder the British nation has been inclined to depend in times of stress upon its ability to "muddle through." It knows of what it is made, and "muddling" probably is an adjective prompted more by modesty than by a desire to express exactly how Britain solves its problems.

To belittle the man in your town who is near, and to magnify the man who is afar ff is like looking through the wrong end of the telescope. Yet it is a common fault. We should extol and exalt our own people when they do that which is right and proper. We should rejoice in the advancenent and promotion of our acquaintances and not just "pooh" their attainments. When we say, "I knew him when —" let us follow it with an eulogy and with pride.

Of course you wash it—but is it clean? We're willing to wager that it is. Then you don't simply go through the motions of washing your face as a habit, but because it makes you feel "right" to know that it is clean and because it is pleasing to the people you meet in the course of the day.

Well then, when you buy stationery for your business, is it not worth while to see that is is printed properly and not to accept printed matter of any kind simply because it is cheap? You wouldn't use jute as a face towel, would you? But it's much cheaper than linen. Business stationery is your "paper face"-your personal representative-why not make sure it represents you properly.
