

IN THE RCAF

Keglers in the RCAF — both service and civilian — are looking forward to another telegraphic bowling tournament...

A feature of the contest, the second of its kind to be conducted in the RCAF, is that it allows each station to enter two men's and two women's teams...

The tournament will mark the climax for bowling leagues which have been operating throughout the R.C.A.C. Since arrangements for last year's bowling tournament were made...

Last year the men's team championship was won by RCAF Station Moose Jaw, Sask., and RCAF Station Whitehorse, Y.T., took the women's team top honors.

IN THE NAVY

Glass boats in the navy? Well, not just glass, but glass reinforced plastic, which is becoming more and more common in the home and elsewhere...

Considerable use is now being made of this material in the Royal Canadian Navy, and 14-foot pulling and sailing dinghies and 27-foot whalers are being produced of glass reinforced polyester resin.

The plastic boats have proved superior to their wooden counterparts in performance, both under sail and under oars, as well as in less and easier maintenance.

Its high strength to weight ratio, its suitability to fabrication into intricate shapes, and its resistance to rot and corrosion make glass-reinforced plastic a desirable material for other applications in the navy.

It has been found very satisfactory for lining refrigerated spaces in warships since it provides a strong impervious lining which is easy to clean and has high insulating qualities.

Canopies for small boats have been fabricated from it and the ease of forming and its light weight have been great advantages.

IN THE ARMY

Gorgeous George and his pals of professional wrestling don't have a monopoly on unarmed combat, says the Canadian Provost Corps.

But the Provosts' version of the not-so-gentle arts is far removed from the mayhem of professional mat-men, because the military policemen's creed is to subdue a man, not to injure him.

To ensure that the Provost Corps doesn't get rusty, courses in unarmed combat are a regular feature of the training at the Canadian Provost Corps School, Camp Shilo, Man., and refresher courses are run regularly at Commands across the country.

Service policemen learn how to fall without injuring themselves, how to do shoulder rolls, back rolls, how to perform "come along" holds, and they are taught to disarm a man armed with a club, knife or gun, and how to break body holds and choke holds.

Courses usually run about two weeks, and to ensure individual instruction, they seldom have more than 18 candidates.

According to Company Sergeant Major (W2) Phil Gagnon, of Windsor, Ont., sergeant major of the Army Headquarters Security Guard, and a specialist in this type of training: "We must know unarmed combat, not only to protect ourselves, but to subdue a man without permanently injuring him."

The Canadian Provost Corps is always unarmed, except in times of war and at pay parades.

In past years, members of the corps have staged many displays

The new executives of the Canadian Celanese Sports Association have been elected last Sunday at the annual general meeting...

\$6,000.00 Adulterated Alcohol Cargo Seized in Dr'ville

The Arrest Made by Detective Ange Aime Allard, of the Municipal Police. — The Driver Released on a \$800. Bail Wednesday.

The perspicacity of a local policeman prevented a bootlegger to go through Drummondville in Wednesday's night with a 320-gallon cargo which happened to be adulterated alcohol...

Hungarian Doctor Joins Research

When Dr. Eors Bajusz (second from left) joined the "Freedom Fighters" of his native Hungary last October, he little dreamed that in three months he would be in the forefront of the fight against Muscular Dystrophy in the western world...

Scientists at the Roscoe E. Jackson Memorial Laboratory at Bar Harbor, Maine, last year succeeded in breeding a strain of mice that genetically transmit muscular dystrophy. This was a great step forward in research work...

Dr. Bajusz, fresh from two years' work at the Institute for Muscle Research in Budapest, ran use some of these mice to try to find out whether hormones are effective in the treatment of muscular dystrophy...

Carpets Provide Beauty, Comfort

The use of carpeting in modern homes has increased greatly in recent years, according to figures on the sale of floor coverings in Canada. No longer is the buying of carpets in new homes, confined to the "living room" and "bedroom"...

In decorative value alone, no other single factor can do so much for a home as a well-chosen carpet. As the foundation of a room's decorating scheme it is the background that brings all furniture into harmony and unifies the room.

Carpet can modify the shape of a room. An unbroken floor covering makes a small room look larger. It gives a sense of order to a room with many joists. Carpets add many other important factors to the atmosphere of any home.

Its softness underfoot not only is restful and relaxing but it is a definite safety factor in preventing accidents. The softness is important for children who sit, crawl, play and frequently fall down on the floor.

Carpet is kind to the ear. In minimizing noise, it is a natural muffler. Another virtue is the warmth it gives a room not only in appearance and atmosphere but in actual insulation against chill floors.

Housewives appreciate most perhaps, the ease-of-care that a carpeted floor provides. Carpets need only to be vacuumed thoroughly once a week with in-between pick-ups of crumbs with a sweeper.

of unarmed combat for the public at the Canadian National and Pacific National Exhibitions, and recently during a tour of Quebec Command.

New School At Drummondville West

Here is the schema of a school which will be under the supervision of RR. SS. de la Presentation de Marie at Drummondville West. The erection has been undertaken early this week by Jeanson Company of Sherbrooke.

Better Street Lighting in Dr'ville

Trout Fishing Opens April 17

According to an old custom at the Department of Fish and Game, the trout fishing season will open on the third Wednesday of April which falls on the 17th this year.

As in the past, it is unlawful to use minnows as bait in waters frequented by speckled trout, grey trout and Quebec red trout, unless the minnows were taken in these same waters.

It is to be noted that the fishing permit of \$1.10, though valid for the holder's wife and his children under 16 years of age, allows only one daily bag limit. Bag limits for all species are included in the booklet which should be asked for when buying a permit.

In the Parks and Reserves, special fishing laws are enforced. Thus, as an example, in the La Verendrye Park and the Chibougamau Reserve, the daily bag limits, for each angler, are as follows: grey trout: 3 or 20 lbs, walleye (dore): 5 or 15 lbs, northern pike: 5 or 30 lbs, bass: 3 or 10 lbs speckled

Issue Discussed by the Municipal Council Monday Evening

The street lighting system has been largely improved in Drummondville over the last year but at their meeting last Monday, members of the Municipal Council admitted the system is very inadequate in many parts of the town...

Councillor Armand Gauthier has been appointed to meet Southern Canada Power officials to lay on the plan by which Drummondville City will be given a highly improved system.

The Automobile, A Huge Industry

The American automobile industry represents one of the most striking aspects of U.S. economic life — an industry that helps shape the country's living patterns.

Designing, manufacturing and selling the American car is, of course, an important and well-publicized part of the nation's economy. Last year the industry turned out almost six million passenger cars.

These sustained rates of production are part of the pattern of widespread ownership. Today there are almost 65 million vehicles — including about 55 million passenger cars — on American highways.

The industry that supplies these bright-hued automobiles is a thriving and highly competitive business. It employs more than 600,000 workers and pays average wages of about \$90 a week.

The auto industry expands a great deal of effort toward meeting the needs and desires of the American consumer. The result has been an American product — a large car with engines that seem to climb in horsepower year by year.

MacMichael Passes Away In Sorel

Mr. George N. MacMichael, formerly of Drummondville, who has been a resident of Sorel for the past five years, died at the Hotel Dieu Hospital in Sorel on Monday afternoon March 4th, after an extended illness.

H. Rubinstein Tells Teen-Agers

"You can't start caring for your complexion too young," says Helena Rubinstein, "and if you want to be beautiful, you should start right now and continue forever."

If you're a teen-ager with skin problems, don't procrastinate — deal with it right now, using this great beauty scientist's medicated beauty treatment.

Next, apply Medicated Beauty Mask made with healing ingredients. Spread a thin film all over your face, thicker on "problem zones" — forehead, nose, chin or wherever you have blackheads and coarse pores.

Finally, tighten pores with "Water Lily" Skin Lotion. Saturate a cotton pad and press into skin over and over again until entire face is covered.

Israel Threatens To Force Showdown Soon

Jerusalem. — Premier David Ben-Gurion said today Israel would take military action against Egypt if the Gaza crisis is not solved through political negotiations.

He told the Israeli parliament that if the time came for military action Israel would strike and "would not, of course, give priority notice of its action."

The crisis was heightened by an Israeli announcement that fedayeen (commandos) from the Gaza strip last night blew up a section of the railroad leading to Israel and cut off all telephone communications between Gaza and Israel.

UN Assistant Secretary General Ralph Bunche called on Egyptian President Gamal Abdel Nasser in Cairo as Ben-Gurion was speaking and made a direct attempt to settle the Gaza crisis.

Bunche said United Nations Emergency Forces would turn over the Gaza administration to Egypt in the same way it returned control of Port Said to Egypt after the Anglo-French invasion.

"However, it is up to the Egyptian authorities to announce when the takeover will take place," he said.

He added: "The UNEF is not an administrative force in Gaza."

7,000 Arabs Demonstrate Reports from Gaza told of renewed demonstrations by 7,000

Arabs for the return of Egyptian control. The reports said there were no incidents of violence.

Bunche met with Nasser for 90 minutes. Afterwards he said his talks with Nasser were "very helpful and constructive."

Bunche said he conveyed to Nasser, on behalf of the United Nations and Secretary General Dag Hammarskjold, the "deepest regret" on the death of an Arab in the Gaza strip demonstration Sunday.

He said he would probably leave for Gaza tomorrow for a further inspection of the UNEF.

Wins Two Motions Bunche survived two motions of non-confidence posed by his opposition political parties after reassuring the lawmakers Israel would not take lying down Egypt's return to the Gaza strip.

The Time To Act Is Now

We shall get safety when it comes from a change in the hearts of men whereby they first recognize the traffic effects of indifference, second they accept their individual share of the responsibility for doing something about it and finally resolve to do more than talk about traffic safety, remarks the Province of Quebec Safety League.

In this, three words hold the key: Recognize, Accept, Resolve. It is more than coincidence that these three words require action on our part.

This photograph was taken Monday in front of the City Hall to outline the opening of the Red Cross 1957 campaign in Drummondville. We see from left to right: Chief of police Conrad Proulx, Miss Marguerite Courchesne, secretary, R. N. Ferguson, joint-president, Mayor Marcel Arsen, Roland Tessier, treasurer of the City, Mrs. Paul Normandeau, feminine section president, Mr. Austin Lloyd, of Canadian Celanese, D. W. Johnston, from Dominion Textile Co., W. A. Gosselin, treasurer, Felix Gagnon, joint-president. In background, captain J. M. Precourt and constable Gerard Lefebvre preparing to lift the Red Cross flag.

Stimulation In Reserve

By Joseph Lister Rutledge
Here is perhaps more than a fact that the years of Canada's greatest development as a steel producer roughly parallel the years of the great development of this country.

Prior to the first World War Canada's steel capacity totalled about 1,200,000 tons a year and there was a population of something over seven million people. In the years that followed, steel output quadrupled, our population grew to sixteen million and personal income, which as late as 1929 was a little over \$4.5 billion, by 1950 had reached \$14 billion and was still growing.

A notable address delivered by Mr. V. W. Scully, vice-president and general manager of the Steel Company of Canada, to the Canadian Managing Editors' Conference in Hamilton, presented dramatically the strategic importance of steel. It was obvious, as Mr. Scully pointed out, that a great basic industry such as this always faces problems. In Canada the problems have been intensified by the need to provide a wide diversification of products with an output only a fraction of that enjoyed by similar industries in the United States.

This is a handicap of major proportions and added to it is the need that not everyone understands, a need to reach beyond its own actual operations to the search for and the actual development of the raw materials necessary for production. The demands for such products are so great that it is impossible to depend entirely on the good offices

of others to assure this supply. As it is true that technical developments were the forerunners of the development of steel, so steel placed the development of Canada, for the simple reason that steel is a basic commodity in all occupations and industries.

A group of allied industries that since World War II have spent \$450 million of dollars in plant expansion to make this growing output and actuality is faced with its considerable share of the confiscatory taxes with which this country is burdened.

It is as Mr. Scully has described it, "a disease like creeping paralysis." It is evident in the steady siphoning-off of resources essential to the continuation of this growth. Shut off this supply and expansion must slowly grind to a halt. And when steel, and other basic industries of the kind, must think in terms of retrenchment rather than development, it is time for Canada to give a thought to tightening its own belt. Canada has progressed as steel progressed. What happens when you put this stimulation in reverse? Don't we know? In more familiar terms, what happens when we shut off the gas?

PROOF THAT SPRING IS ON ITS WAY

Central Press Canadian

Don't let the snow and cold fool you. Spring is really on the way. If any proof is needed, here are five new-born kids, born on the farm of Frank Dawson in Islington, Ont. Soon they'll be out gamboling under the bright sun and crocuses will be blooming and the smell of spring will be in the air.

The highest or any tender not necessarily accepted.
All offers received are conditional upon the purchaser's obligation to pay over and above the purchase price, all taxes Federal and/or Provincial exigible with the sale of the assets.
Montreal, March 11th, 1957.
HENRY S. PESNER, C.A., Trustee.

KISSING DISEASE SPREADS BUT NOT AMONG TEEN-AGERS

In an enviable position is David Burns, 17, of Brampton, Ont. He's immune to mononucleosis, a disease which results in sore throat and fever and which afflicts one in every 20 citizens—or did afflict them before it was found that the disease was spread by kissing. But it

is help in returning to a state of good health and reassurance.

If the parents adopt an attitude of calamity, they may transmit to him a lifelong fear of illness in a matter of minutes, in addition to giving no help at all. The guilt attitude, in which the parents bla-

review all the things that they did or neglected to do, leading up to the illness, fails to give the child help in coping with his illness, and may give him an antagonistic attitude towards them.

The selfish attitude in which the parents will blame the child for getting sick on purpose in order to thwart them of a trip or a party, leaves the child with his illness and the added feeling that he is rejected by his parents, and no direction as to how to deal with his illness. Then, there is the attitude in which the parents claim that the child is bluffing, and that no one in their family is ever ill. This adds the loneliness of being unable to communicate and share his feelings with his parents, to the discomfort of the illness.

Over-solicitousness must be avoided as well, which can easily lead to the child becoming an unreasonable dictator in the home, willing to use illness as a psychological weapon against the parents. A combination of all these attitudes may occur. In each instance, the basic problem of illness and

recovery is complicated by fear, guilt or over-solicitousness. The me themselves for the illness and child is confused by irrelevancies, is often baffled, and the road to recovery is prolonged.

Dr. Johnson says that first the doctor's help where necessary. This is not the time for placing blame. . . the child is interested not in how he became sick, but in how he should go about getting well.

"Even minor illnesses require attention to five basic considerations: rest, diet, elimination, treatment, and investigation. The parent can assist the child in considering each of these in turn, and in evolving a regimen of treatment," writes Dr. Johnson.

"The day's routine activities are restored to normal on the basis of the child's improving health, and not on the basis of the child's or the parent's whims. The household and family activities do not stop because the child is ill, but are modified to compensate for the limitations set by the actual illness", he concludes.

Beauty Hints

There are only beautiful brides. Love, fulfillment of your heart's desire and anticipation of living happily forever after give you breathtaking radiance. Everything about your wedding must be perfect, including the complexion you present to your audience and your dearly beloved.

Fragile, starry-eyed, pink and pretty — that's the way brides should look. This year, the delicate and bride-y look is the look for all make-up. It starts with the use of the right glamour make-up base, delicately tinted to give your skin an all-over radiance. This base should also be a moisturized one, so that through the ceremony the toasts and for hours after, there'll be no chance of it caking or going streaky.

With the Glow that Flatters Du Barly moisturized Flatter Glo make-up base, your skin keeps velvet-smooth and fresh looking for hours and you won't have to take surreptitious peeks in the mirror to make sure you're looking dewy-fresh and beautiful. Another thing — any little imperfections in your skin sometimes the party-rounds prior to your wedding do bring up little bumps on your skin are beautifully concealed by Flatter Glo. One of the loveliest shades in it is Rose Blush — happy with most colorings.

You'll have more color this day than other times. So — the merest whisper of Bloom gives a pretty glow to your skin. You don't have to worry about what shade you should buy with this particular rouge. Bloom is the right tone whatever your skin coloring!

When you put on your powder this day, any day, remember to press it on all over your face and throat. Press it on; use lots. Then brush off the excess with absorbent cotton. This technique makes for a longer-lasting make-up, works with your make-up base to eliminate the need for furtive touch-ups. We think Champagne Beige is a true bridal name for one of the prettiest powder shades.

Stars on your eyes
For your eyes, a touch of Star Grey eyeshadow, to match the stars in your eyes. It's a delicate accent, but see how it gives your eyes depth and luminosity. For your lips, the young fresh look of DuBarry Peachy Pink lipstick. It's neither too dark nor too light — a soft but lively and lovely tone. Take a moment and set it with a bit of tissue held between your lips, then it won't kiss off!

To set the make-up on your neck and chest so it won't smudge your bridal gown, spray on your favorite Essent mist. Perhaps "New Horizons" fragrance, it's light and delicate and feminine as your satin slippers.

Hair Hints
We hope you've had your hair carefully washed and set the day before, so that it has had a chan-

ce to soften a little. Comb it into place; then, to make sure it stays in place, every lock, mist it over lightly with a lacquer like Setting Pretty. It's so light, soft, non-flaking, and it has the delicate fragrance of a sunny meadow — just enough to be pleasant without being conflicting.

Second Boom

A revival of interest in uranium shares has held the spotlight on stock markets recently, reports The Financial Post.

But for the most part this latest wave of buying differs considerably from the speculative fever which gripped uranium shares in 1955.

The current demand, say brokers, is of investment calibre and is coming from institutional buyers and individuals operating on long-term investment principles.

Uranium shares went through a year-long wringing-out process from late 1955 to late 1956. Demand showed signs of reviving in the last quarter of 1956 and continued driving prices up mildly into this year. In recent sessions, buying interest ballooned.

CLASSIFIED ADVERTISING

Montreal, February 22nd, 1957.

Take it from ED SULLIVAN:

Meteor's thrifty Six saves dollars... makes sense!

Fuel economy is just one of the many reasons why more and more Canadians with a thrifty nature are climbing aboard the "Meteor Six bandwagon." First cost is substantially lower. Operating costs are slim. And Meteor's Six is so well-engineered, so beautifully designed, that a serviceman rarely sees it—except at auto shows! Add to these facts the high 144 hp. rating and short-stroke low friction design, and you see why Meteor's Six is Canada's most modern, cost-savingest engine. It's available in all Magnificent Meteor Niagara models. Climb aboard—it makes good sense.

Magnificent Meteor.
